## CONNECTING SHAPES, DVD Number One

In this DVD, *Connecting Shapes*, Eric will demonstrate how to paint through the boundaries of objects to create new shapes. Through this process major design concepts are discussed; such as, creative edge quality, reflected light, better and larger shape construction, and how to avoid annoying "halos". This video will enable you to create loose and expressive watercolors with better shape designs.

Watch as the painting unfolds into a loosely defined painting, tying the shapes together.
